

**Listing of Claims:**

Claim 1 (currently amended): A gaming device comprising:  
~~a primary game including a plurality of reels having a plurality of symbols, at least one of said symbols including a modifier activator symbol;~~  
~~a plurality of different modifiers, each one of the modifiers corresponding to a plurality of activations of the reels;~~  
at least one display device;  
at least one input device;  
at least one processor; and  
at least one memory device which stores a plurality of instructions, which when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

- (a) display a primary game including a plurality of reels having a plurality of symbols, at least one of said symbols including a modifier activator symbol;
- (b) activate the reels and display at least one of said symbols;
- (c)(b) provide any award based on the at least one displayed symbol;
- (d)(c) determine whether at least one of the modifier activator symbol symbols is displayed on the reels;
- (e)(d) in response to the display of the modifier activator symbol, display a plurality of different modifiers;
- (f) after the plurality of different modifiers are displayed, receive an input from a player, the input corresponding to a selection of one of the displayed plurality of modifiers; select the modifier corresponding to the determined modifier activator symbol;
- (g)(e) after the selection, reactivate the reels one or more times;
- (h)(f) apply the selected modifier to modify at least one function of the primary game for each one of the reactivations of the reels; and
- (i)(g) in response to a winning outcome for at least one of the reactivations, provide an additional any award based, at least in

part, on the at least one modified function of the primary game.  
~~selected modifier.~~

Claim 2 (previously presented): The gaming device of claim 1, wherein a plurality of said symbols are modifier activator symbols.

Claim 3 (currently amended): The gaming device of claim 1, the instructions including a plurality of instructions executable to receive a signal corresponding to the input from the player in response to ~~cause the at least one processor to select one of the plurality of modifiers if a plurality of modifier activator symbols~~ being ~~are displayed.~~

Claim 4 (currently amended): The gaming device of claim 1, the instructions including a plurality of instructions executable to receive a signal corresponding to a second input from the player, the second input corresponding to a selection of a second one of the displayed plurality of modifiers. ~~cause the at least one processor to select more than one modifier.~~

Claim 5 (previously presented): The gaming device of claim 1, the instructions including a plurality of instructions executable to cause the at least one processor to apply a plurality of selected modifiers to modify a plurality of functions of the primary game.

Claim 6 (previously presented): The gaming device of claim 1, which includes an active modifier counter associated with each of the modifiers, said active modifier counter being operable to indicate any currently selected modifier and a plurality of remaining subsequent activations of the reels that the modifier will be selected.

Claim 7 (currently amended): The gaming device of claim 1, the instructions including a plurality of instructions executable to receive a signal corresponding to the input from the player ~~cause the at least one processor to select one of the plurality of~~

~~modifiers~~ if said modifier activator symbol is displayed and no modifiers are currently activated.

Claim 8 (previously presented): The gaming device of claim 1, which includes a modifier generator displayed to the player that includes said plurality of modifiers.

Claim 9 (currently amended): The gaming device of claim 8, the instructions including a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to the input from the player, the input corresponding to the selection of ~~select~~ at least one of the plurality of modifiers.

Claim 10 (currently amended): The gaming device of claim 8, wherein said instructions include a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to the input from the player ~~selects at least one modifier for each activation of the reels if~~ no modifiers are currently activated.

Claim 11 (previously presented): The gaming device of claim 9, wherein said selected modifier is activated if said modifier activator symbol is displayed.

Claim 12 (currently amended): The gaming device of claim 8, wherein said instructions include a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to another input from the player, the another input corresponding to another selection of one of the displayed plurality of modifiers. ~~selects at least one modifier for each activation of the reels.~~

Claim 13 (previously presented): The gaming device of claim 14, said modifier generator being configured to spin if the at least one modifier is not displayed on the reels.

Claim 14 (previously presented): The gaming device of claim 8, wherein said modifier generator includes a modifier reel.

Claim 15 (currently amended): The gaming device of claim 1, the instructions including a plurality of instructions executable to cause the at least one processor to enable the player to select a plurality ~~at least one~~ of the modifiers.

Claim 16 (previously presented): The gaming device of claim 1, wherein each modifier is associated with the same plurality of subsequent activations of the reels.

Claim 17 (previously presented): The gaming device of claim 1, wherein a plurality of said modifiers are each associated with a different pluralities of subsequent activations of the reels.

Claim 18 (currently amended): A gaming device comprising:

~~a primary wagering game including a plurality of reels having a plurality of symbols, at least one of said symbols being a modifier activator symbol;~~

~~a plurality of different modifiers, each one of the modifiers corresponding to at least one subsequent activation of the reels, at least one modifier corresponding to a plurality of subsequent activation of the reels;~~

at least one display device;

at least one input device;

at least one processor;

~~a triggering event associated with said primary wagering game;~~

at least one memory device which stores a plurality of instructions, which when executed by the at least one processor ~~after the triggering event occurs~~, cause the at least one processor to operate with the at least one display device and the at least one input device to:

(a) display a primary wagering game including a plurality of reels having a plurality of symbols, at least one of the symbols including a modifier activator symbol, the primary wagering game being associated with at least one award, the at least one award being associated with a winning condition;

(b)(a) activate said plurality of reels to indicate at least one of the symbols;symbol;

(c)(b) provide the at least one any award as a result of the indicated symbol corresponding to the winning condition; ~~based on the at least one symbol indicated on the reels;~~

(d)(c) determine whether the modifier activator symbol is indicated on the reels;

(e)(d) in response to the indication of the modifier activator symbol, display a plurality of modifiers, each of the plurality of modifiers corresponding to a quantity of at least one subsequent activation of

the reels, the quantity being greater than one for at least one of the modifiers;

- (f) after the display of the plurality of modifiers, receive an input from a player, the input corresponding to a selection of one of the displayed plurality of modifiers;~~select one of the plurality of modifiers after the modifier activator is indicated on the reels;~~
- (g)(e) after the selection, perform the quantity of subsequent activations which correspond to the selected modifier;~~reactivate the plurality of reels to indicate at least one symbol;~~
- (h)(f) apply the selected modifier to modify at least one function of the primary wagering game, for each of the reactivated reels, at least one of: (i) the at least one award, if any, based on at least one symbol indicated on the reels; and (ii) the winning condition of the primary wagering game; and
- (i)(g) in response to an occurrence of the winning condition for at least one of the subsequent activations, provide an additional any-award based, at least in part, on the modification.~~selected modifier.~~

Claim 19 (previously presented): The gaming device of claim 18, wherein the triggering event is the player making a wager on the primary wagering game.

Claim 20 (currently amended): A gaming device comprising:

~~a primary wagering game operable upon a wager by a player, said primary wagering game including symbols, at least one symbol including at least one modifier activator symbol;~~

~~a plurality of modifiers, each one of the modifiers corresponding to at least one subsequent play of the primary wagering game, at least one of the modifiers associated with a plurality of subsequent plays of the primary wagering game;~~

a display device;

at least one input device;

at least one processor; and

at least one memory device which stores a plurality of instructions, which when executed by the at least one processor, cause the at least one processor to operate with the display device and the at least one input device to:

(a) display a primary wagering game operable upon a wager by a player, said primary wagering game including symbols, the symbols including at least one symbol modifier activator symbol;

~~(b)~~(a) operate ~~enable the player to play the~~ primary wagering game;

~~(c)~~(b) display at least one of the symbols;

~~(d)~~(c) determine whether the at least one modifier activator is displayed;

~~(e)~~(d) in response to the display of the at least one modifier activator, display a plurality of modifiers, each one of the modifiers corresponding to a quantity of at least one subsequent play of the primary wagering game, the quantity being greater than one for at least one of the modifiers;

(f) after the display of the plurality of modifiers, receive an input from a player, the input corresponding to a selection of one of the displayed plurality of modifiers;~~select the modifier corresponding to the displayed modifier activator;~~

~~(g)~~(e) after the selection, activate the selected modifier for at least one of the subsequent plays of the primary wagering game;

- (h)(f) operate the quantity of subsequent plays of the primary wagering game, said quantity corresponding to the selected modifier; at least one subsequent play of the primary wagering game;
- (i)(g) apply the selected modifier to the primary wagering game for the quantity of at least one subsequent plays play of the primary wagering game; and-
- (i)(h) in response to a winning outcome for at least one of the subsequent plays of the primary wagering game, provide an additional any-award, the additional award being based, at least in part, on the selected modifier.

Claim 21 (previously presented): The gaming device of claim 20, wherein a plurality of said symbols are modifier activator symbols.

Claim 22 (currently amended): The gaming device of claim 20, the instructions including a plurality of instructions executable to receive a signal corresponding to the input from the player in response to ~~cause the at least one processor to select one of the plurality of modifiers if a plurality of modifier activator symbols~~ being are displayed.

Claim 23 (currently amended): The gaming device of claim 20, the instructions including a plurality of instructions executable to receive a signal corresponding to a second input from the player, the second input corresponding to a selection of a second one of the displayed plurality of modifiers. ~~cause the processor to select more than one modifier.~~

Claim 24 (previously presented): The gaming device of claim 20, the instructions including a plurality of instructions executable to cause the at least one processor to apply a plurality of selected modifiers to modifier a plurality of functions of the primary wagering game.

Claim 25 (previously presented): The gaming device of claim 20, which includes an active modifier counter associated with each of the modifiers, said active modifier counter being operable to indicate any currently selected modifier and a plurality of remaining subsequent plays of the primary wagering game that the modifier will be selected.

Claim 26 (currently amended): The gaming device of claim 20, the instructions including instructions executable to receive a signal corresponding to the input from the player ~~cause the at least one processor to select one of the plurality of modifiers if said modifier activator symbol is displayed and no modifiers are currently activated.~~

Claim 27 (previously presented): The gaming device of claim 20, which includes a modifier generator displayed to the player that includes said plurality of modifiers.

Claim 28 (currently amended): The gaming device of claim 27, the instructions including a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to the input from the player, the input corresponding to the selection of ~~select at least one of the plurality of modifiers.~~

Claim 29 (currently amended): The gaming device of claim 27, wherein said instructions include a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to the input from the player ~~selects at least one modifier for each play of the primary wagering game if no modifiers are currently activated.~~

Claim 30 (previously presented): The gaming device of claim 29, wherein said selected modifier is activated if said modifier activator symbol is displayed.

Claim 31 (currently amended): The gaming device of claim 27, wherein said instructions include a plurality of instructions executable to cause the at least one processor to operate with the modifier generator to receive a signal corresponding to another input from the player, the another input corresponding to another selection of one of the displayed plurality of modifiers. ~~selects at least one modifier for each play of the primary wagering game.~~

Claim 32 (previously presented): The gaming device of claim 27, said modifier generator being configured to spin if the at least one modifier is not displayed on the reels.

Claim 33 (previously presented): The gaming device of claim 27, wherein said modifier generator includes a modifier reel.

Claim 34 (currently amended): The gaming device of claim 20, the instructions including a plurality of instructions executable to cause the at least one processor to operate with the at least one input device to enable the player to select a plurality at ~~least one of the modifiers.~~

Claim 35 (previously presented): The gaming device of claim 20, wherein each modifier is associated with the same plurality of subsequent plays of the primary wagering game.

Claim 36 (previously presented): The gaming device of claim 20, wherein a plurality of said modifiers are each associated with a different pluralities of subsequent plays of the primary wagering game.

Claim 37 (currently amended): A gaming system comprising:

at least one display device;

at least one input device;

at least one processor; and

at least one memory device which stores a plurality of instructions, which when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

- (a) receive an input based on a wager;
- (b) operate a first play of a primary game, the primary game having a plurality of reels, the reels having a plurality of symbols, the symbols having at least one modifier symbol, at least one of the symbols being associated with a winning condition;
- (c) generate a plurality of the symbols;
- (d) provide an award as a result of the winning condition being satisfied;
- ~~(e)(d)~~ in response to the generated symbols including the at least one modifier symbol, activate a modifier generator, in response to the modifier symbol being generated, the modifier generator displaying having a plurality of modifiers;
- ~~(f)(e)~~ after the display of the plurality of modifiers, receive an input from a player, the input corresponding to a selection of one of the displayed plurality of modifiers; generate at least one of the modifiers based on the activation of the modifier generator;
- ~~(g)(f)~~ after the selection, operate a second play of the primary game;
- ~~(h)(g)~~ modify, at least one function of for the second play, based on the selected generated modifier, at least one of: (i) the award, if any; and (ii) the winning condition of the primary game; and
- ~~(i)(h)~~ in response to a winning outcome for the second play of the primary game, provide an additional any award, the additional

award being based, at least in part, on the modification of step  
(h).generated-modifier.

Claim 38 (currently amended): A method of operating a gaming device, said method comprising:

(a) displaying a game including a plurality of reels, wherein each of said reels includes a plurality of symbols including a modifier activator symbol;

(b) activating said plurality of reels;

(c) providing a player any award based on the symbols displayed on the reels after said activation;

(d) in response to the display of the modifier activator symbol, displaying a plurality of different modifiers, wherein each of said modifiers is associated with a quantity of subsequent activations of the reels, the quantity being at least one;

(e) after the display of the plurality of modifiers, receiving an input from the player, the input corresponding to a selection of one of the displayed plurality of modifiers, selecting at least one of a plurality of different modifiers after said modifier activator symbol is displayed on said reels, wherein each of said modifiers is associated with a quantity of subsequent activations of the reels, the quantity being at least one;

(f)(e) repeating steps (b) to (c) at least the quantity of times, wherein at least one function of the game reels is modified based on the selected modifier; and

(g)(f) for each of the subsequent activations of the reels, providing the player an outcome, the outcome being any award based on, at least in part, the modification of the function of the game. selected modifier.

Claim 39 (previously presented): The method of claim 38, wherein a plurality of said symbols are modifier activator symbols.

Claim 40 (previously presented): The method of claim 38, which includes indicating any modifier that is currently selected and the plurality of remaining subsequent activations of the reels that the modifier will be selected.

Claim 41 (currently amended): The method of claim 38, which includes enabling the player to select a plurality at least one of said modifiers.

Claim 42 (previously presented): The method of claim 38, wherein each modifier is associated with the same plurality of subsequent activations of the reels.

Claim 43 (previously presented): The method of claim 38, wherein a plurality of said modifiers are each associated with a different plurality of subsequent activations of the reels.

Claim 44 (previously presented): The method of claim 38, wherein more than one modifier is activated for at least one subsequent activation of the reels.

Claim 45 (previously presented): The method of claim 38, which is provided to the player through a data network.

Claim 46 (previously presented): The method of claim 45, wherein the data network is an internet.

Claim 47 (currently amended): A method of operating a gaming device, said method comprising:

(a) ~~operating a~~ enabling a player to play of a primary wagering game, wherein said primary game is associated with at least one winning outcome and includes at least one modifier activator symbol;

(b) providing any award in response to the at least one winning outcome;

(c)(b) ~~determining whether the modified activator symbol is~~ displayed; ~~generated~~;

(d)(e) in response to the display of the at least one modifier activator symbol, displaying a plurality of different modifiers;

(e) after the display of the plurality of modifiers, receiving an input from the player, the input corresponding to a selection of one of the displayed plurality of modifiers, selecting at least one of a plurality of different modifiers after the player obtains at least one of said modifier activator symbols in the primary wagering game, wherein each of said modifiers is associated with a quantity of at least one subsequent play of the primary wagering game;

(f)(d) repeating steps (a) to (b) at least the quantity of times, wherein at least one function of the primary wagering game is modified based on the selected modifier; and

(g)(e) for each of the subsequent plays which result in the at least one winning outcome, providing an additional any award, the additional award being based, at least in part, on the modification. selected modifier.

Claim 48 (previously presented): The method of claim 47, wherein at least one of the plurality of modifiers is selected if the player obtains at least one modifier activator in one of the subsequent plays of the primary wagering game.

Claim 49 (previously presented): The method of claim 47, which includes the step of indicating any modifier that is currently activated and the plurality of remaining subsequent plays of the primary wagering game that the modifier will be activated.

Claim 50 (currently amended). The method of claim 47, wherein the player is enabled to select a plurality ~~at least one~~ of the modifiers.

Claim 51 (previously presented): The method of claim 47, wherein each modifier is associated with the same plurality of subsequent plays of the primary wagering game.

Claim 52 (previously presented): The method of claim 47, wherein a plurality of said modifiers are each associated with a different plurality of subsequent plays of the primary wagering game.

Claim 53 (previously presented): The method of claim 47, which is provided to the player through a data network.

Claim 54 (previously presented): The method of claim 53, wherein the data network is an internet.

Claim 55 (currently amended): The gaming system of claim 37, wherein the at least one function includesing at least one primary game outcome.

Claim 56 (currently amended): The gaming system of claim 37, wherein the at least one function includesing at least one primary game award.

Claim 57 (new): The gaming device of claim 1, wherein the instructions include a plurality of instructions executable to cause the at least one processor to operate with the at least one display device to, for at least one of the reactivated reels:

- (a) receive a second input, the second input corresponding to an activation of at least one payline;
- (b) for the at least one activated payline:
  - (i) apply the selected modify to at least one function of at least one symbol indicated by the payline; and

- (ii) determine the additional award based on the modified function.
